

Erasmus+

Nino Aduashvili (Ilia State University, Georgia, incoming student at the Faculty of Business in February – July 2017)

My name is Nino Aduashvili and I'm a student at Ilia State University (Tbilisi, Georgia). My university collaborates with Babeş-Bolyai University and I sent my documents for mobility at UBB for spring semester in 2017. Erasmus + exchange program gives students the chance to study at another university and get foreign experience. Erasmus is a great chance to meet new cultures, have foreign friends and live for a while in another country.

For me, Romania is a country of relations, friendship, caring and getting ahead. A country of wonderful places and interesting culture. This is a traditional country but it's open for technology, development and changes that make the future better. Romanian people are hardworking and I'm sure this country has a great future. Every main city of Romania has its' beauty and value. Even the name "Romania" sounds very familiar for me and I would be always happy to visit this country.

At UBB there are highly qualified professors who are ready to help students. They are sharing their experience and giving knowledge. At UBB courses were interesting and practical. We had different activities. During indoor activities we were working in groups and dealing different kind of quiz and we had lots of interesting things to study . We also had outdoor activities such as primary research and I found out that Romanian people are always ready to help you and answer to your questions.

My advice for future Erasmus + students is "take every moment and chance of your Erasmus. This is a lifelong experience and this period of your life will take a big place in your memories and in you heart. Be ready for new people and use each and every second. Have a good luck and enjoy with one My favorite country Romania.

La Revedere.
